EXECUTIVE INSIGHTS SERIES
Mini Project 3 • Country Comparison

Global Country Development & Economic Comparison Analysis

Comprehensive multi-dimensional assessment of economic output, population healthcare standards, energy production reserves, and digital connectivity maturity.

PRESENTED BY
Seif Eldeen Ahmed

TOTAL POPULATION ANALYZED	AVERAGE GLOBAL GDP	GLOBAL LIFE EXPECTANCY	COUNTRIES COVERED
7.0 Billion	$255.85B	57.91 Years	200+ Nations

PRESENTATION ROADMAP

Core Pillars of Analysis

01

Executive Overview

Population geography, regional GDP ranking, and market concentration benchmarks.

02

Health & Education

Life expectancy comparison, infant mortality metrics, and birth rate dynamics.

03

Economic Performance

Highest growth countries, inflation analysis, trade balance, and GDP growth indicators.

04

Energy & Infrastructure

Natural gas reserves, electricity generation, internet penetration, and transport matrix.

PILLAR 01 • EXECUTIVE OVERVIEW

Global GDP Distribution & Population Ranking

Key Metrics: **Avg GDP $255.85bn** | **Top GDP US $11.75T**

Economic Dominance

United States ($11.75T) and European Union ($11.65T) lead total global output, followed by China ($7.26T) and Japan ($3.75T).

Regional Concentration

Western Europe and North America contain the highest proportion of high-income populations, while lower-income countries cluster in South Asia and Africa.

Lowest Inflation Leader

Nauru records the lowest inflation rate among surveyed nations, showcasing distinct price stability within smaller island economies.

PILLAR 02 • HEALTH & SOCIAL INDICATORS

Life Expectancy, Mortality & Demographic Trends

Global Stats: **Avg Life Exp 57.91 yrs** | **Infant Mort 30.25**

Longevity Top Performers

Andorra (83.51), Macau (82.03), San Marino (81.62), and Singapore (81.62) lead global life expectancy metrics.

GDP Correlation

Scatter plot analysis confirms higher-income countries cluster closely between 75 to 83 years of life expectancy.

Birth & Death Rate Dynamics

Developing economies (e.g., Niger, Uganda, Mali) exhibit high birth rates (44–48) relative to death rates (13–26).

PILLAR 03 • ECONOMIC ANALYSIS

Growth Rates, Inflation & Trade Balances

Averages: GDP Growth 3.85% | Inflation 4.48% | Exports 10T

Highest Growth Leaders

Iraq (52.3%) and Chad (38.0%) lead global GDP expansion rates, driven by resource recovery and post-reconstruction rebounds.

Contraction & Inflation Risk

Zimbabwe (-8.2%) and Haiti (-3.5%) experience severe economic contractions. High inflation impacts Dominica (55%) and Angola (44%).

Export Champions

European Union (1.1T), Germany (0.9T), and United States (0.8T) dominate total export volume worldwide.

PILLAR 04 • RESOURCE DYNAMICS

Global Energy & Natural Resources Analysis

Energy Totals: Oil 78.66M bbl | Gas 2.88T | Elec 18.85T

Electricity Generation Leaders

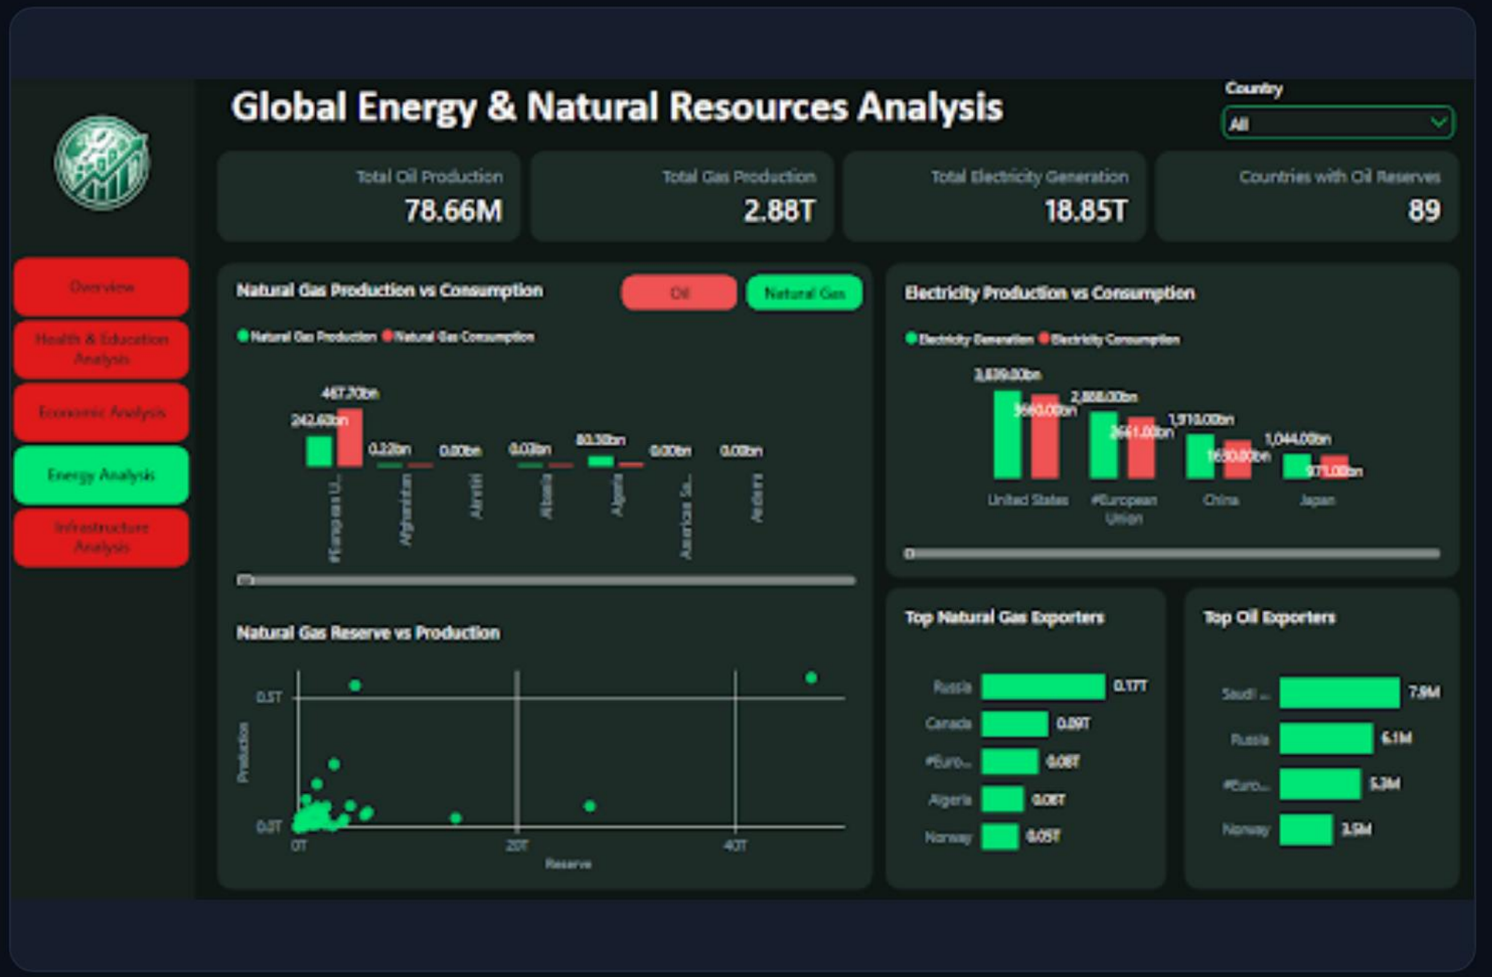

United States (3,839bn kWh) and European Union (2,888bn kWh) lead worldwide electricity generation and consumption.

Top Exporters

Saudi Arabia (7.9M bbl/day) and Russia (6.1M bbl/day) dominate oil exports, while Russia leads natural gas exports (0.17T).

Oil Reserves Country Count

89 nations possess active proven oil reserves, underscoring energy sector concentration in key export hubs.

PILLAR 05 • CONNECTIVITY & LOGISTICS

Digital Reach, Internet Hosts & Transport Networks

Infrastructure Totals: **908M Users** | **193M Hosts** | **33M Km Highway**

Digital Infrastructure Dominance

European Union leads regional digital footprint with over 206M internet users and 22M dedicated internet hosts.

Infant Mortality Disparities

Nauru (90) and Liberia (85) show elevated infant mortality rates, linked directly to healthcare and sanitation infrastructure constraints.

Transport Grid Backbone

Global network spans 33M kilometers of highway and 1M kilometers of railway lines supporting commercial freight distribution.
